Hand Hygiene Club

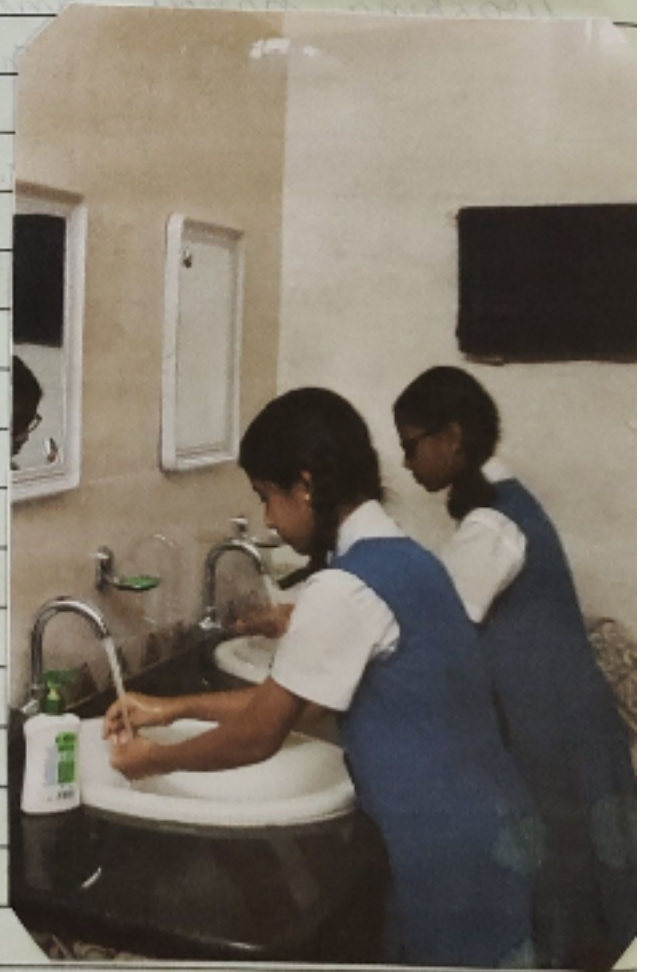

Health Education is important in building a better society. This is because healthy citizens work and interact with others better. Health Education develops the awareness, skills and positive attitudes of students towards health.

Health Education teaches physical, mental, emotional, and social health.

It helps students to improve and preserve their health, avoid illness and reduce behaviors.

On 17th October 2022 our school Health and Hygiene club had organised an activity on washing hands and trimming nails. The main purpose of this activity was to create awareness among the students regarding cleanliness and its benefits. To prevent illness and have positive health attitude.
